# WIN-4738: Afghan Awards Data Suppression

The US Government (GSA) is suppressing Afghan businesses with Awards or Debarments to protect Afghans Business entity's contracts with the US government. Therefore D&B is asked to suppress any such data. The solution is to strike from ASCENT and downstream systems any Awards or Debarments tied to D&B records

Markets – Afghanistan

Monitoring Data Changes – Yes

Volume of DUNS – 1145

Sample DUNS – 790238851, 123456787, 005421136

Data Blocks Impacted – eventfilings_L1 to L3

Seeding – One time correction

# WIN-3902: Failure/Delinquency NORMS – Global Coverage (Denmark ,Hungary, Poland, Finland, Serbia, Slovenia, Japan, Singapore)

Global Trade team expanded the Delinquency and Failure score NORMS data for the below markets, this is a passthrough from D+/PRIME

**Update Frequency** –  Monthly File

**Seeding** – The data load was done Production since Dec 2nd

**Markets –** Denmark, Hungary ,Poland, Finland, Serbia, Slovenia, Japan, Singapore

# WIN-4714 Source of Wealth - Additional Derived Elements

The changes are to provide predicted salary (analytics model driven) for role players(roleDetails) and provide total predicted salary for a resolved role player (ResolvedRolePlayerDetails).

- Analytics team have developed a model to predict salary for UK Principals. Along with the modelled salary for each of the organizations the role player is associated these will be aggregated to provide an estimated total income for that individual (Resolved Role Player). Additionally, for the Resolved Role Player we will aggregate the Turnover and Net Worth of the organizations (DUNS) they are associated with plus provide an estimate of the individual's latent wealth based on their shareholdings.

The changes will be coming in late in this release cycle (after Christmas possibly)  but still targeted for Jan 12th Release
